

Company Profile

Name of the Organization	: Global Aqua
Address	: Survey No 9 , Row House No 2 Tirumala Residence, Dhayari, Pune – 411 041.
Telephone No.	: +9120 – 24690008
Contact Person	: Mr. Saketchandra Natu
Mobile No	: 9890993720
Email	: saket@globalaqua.in
Contact Person	: Mr. Rajesh Amle
Mobile No	: 9890993717
Email	: rajesh@globalaqua.in
Web site	: www.globalaqua.in
Field of activities	: Water and Waste water treatment equipments and services from concept to Design to execution. : Standard products for commercial and industrial sector. : ASC contracts for plants including managing contracts for water & waste water plants.

APPLICATION WISE PRODUCT REQUIREMENTS

APPLICATION	PRODUCTS OFFERED BY GLOBAL AQUA
<ul style="list-style-type: none"> Hotel Industry 	<ul style="list-style-type: none"> Water Filtration system for turbid waters. Water Softeners for bathing, laundry, hot water boilers etc. Ultra violet devices for bacteria purification Cartridge filters for point of use purification near coolers etc. Reverse Osmosis plants for Drinking for high salinity water Purifiers with chiller unit Sewage treatment plant for recycling of waste water to garden or toilet flushing. Rain Water Harvesting
<ul style="list-style-type: none"> Household Market 	<ul style="list-style-type: none"> Domestic RO / UF purifier Water softeners for household, bungalows etc. Domestic Ultra Violet Purifier for bacteria purification Centralised water treatment systems for society, colony Swimming pool filtration systems
<ul style="list-style-type: none"> Drinking water at offices, factory premises 	<ul style="list-style-type: none"> Ultra violet devices for bacteria purification Reverse Osmosis plants for hard water – centralised or individual near drinking water points. UV & RO purifiers with built in chiller unit for pure and chilled water
<ul style="list-style-type: none"> Pharmaceuticals 	<ul style="list-style-type: none"> Online cartridge filters for micron filtration – various grades Demineralisation (DM) plants – portable units for laboratory applications / industrial units for process use Reverse Osmosis systems Ultra violet purification for Industrial use Portable softeners or DM for Autoclaves in Hospitals etc.
<ul style="list-style-type: none"> Mineral Water / Soda water Industry 	<ul style="list-style-type: none"> Mineral water plants – Complete job with ready to use RO plants, filtration, etc. Soda water plants Spares like quality cartridge filters, UV lamps etc.
<ul style="list-style-type: none"> Industrial Use for Boiler feed, Cooling tower make up, Process water, 	<ul style="list-style-type: none"> Water Softeners for Boiler feed, cooling tower make up, rinsing use etc. DM plants for high pressure boilers for Sugar factories , Pharma, Plating lines, Electronic industry etc. Recycle plants for sewage or industrial waste. Waste water recycling plant for cooling tower make up or vehicle washing. RO plant at the outlet of ETP for waste water to reuse for process. Side stream filtration unit for cooling tower.

Infrastructure :

- Office set up :

Well equipped and furnished office. The stocks for fast moving items, products are kept here.

- Fabrication Set up :

Dealing with standard vendors for Complete fabrication facility and rubber lining facility available in Chikhali & Narhe area to do quality jobs.

- Assembly set up :

The assemblies of small and medium plants are done in house so as to minimize time spent at site, products are factory tested. we have adequate tools & tackles for job assembly

- Engineering Capability :

Mostly standard fabrication drawings are available. In house facility is available for AUTOCAD drawings of P & I diagram, Equipment layout, Foundation details and Piping.

- Customer Service Facility :

Three full time service technicians available for attending any service complaints on priority. Special software is developed for customer service with all the data of customer, service visits, problems faced, actions pending, and next service date are logged in routinely.

- Laboratory Testing :

We supply testing kits for on site analysis of various parameters. However, if the laboratory testing is required, we have an attached laboratory to do complete water, soil and waste analysis.
